

# Innovative Dispensing

# Experience IQ - the new Touch & Drink System

- Concentrate dosages are computer-controlled - from 1:5 to a maximum of 1:80 with consistent quality.
- **Two additional drinking water types:** still cooled water and cooled water containing CO<sup>2</sup>. Temperature and CO<sup>2</sup> share can be individually set.
- Easy to use 17" touchscreen.
- Integration into existing databases or release systems using potential-free contact.
- No cleaning required by personnel - self-cleaning after every dispensing process.
- Individual design of user surface possible according to your specifications.
- Information point and dispensing unit in one - "pure sales promotion".
- **Cost reduction by minimising logistics and administration expense.**
- No lugging of crates, no bottle deposits, no storage and cool room necessary any more.

Any existing drinking water system can be retrofitted with an IQ unit!

Favourable finance options with our partner, abcfinance GmbH: Financing, leasing, hire purchase or rent

# Technical data

## IQ Touch & Drink System

### IQ dispensing unit:

- 17" touchscreen based on the APR system
- IQ mixing system

### Cooling system:

- Electrical power requirements: 240 V / 50 Hz / 395 W
- Ready for dispensing 5 minutes after start-up
- Dispenser output: 80 l / hr at temp. 10K
- Dimensions (W/H/D): 430/445/500 mm
- Weight: 28 kg

### Hygiene filter system:

- CARBON 10 fine filter system
- Removes 99.9 % of all parasitic components from water.  
Improves taste, protects the system.

### Concentrate tank:

- Stainless steel or food-safe plastic
- Options: 2.5 l, 4.5 l or 9.45 l

### The following components can be found in the base:

- Cooling system
- Hygiene filter system
- Concentrate tank
- IT system

Tanks supplied by concentrate suppliers can of course also be used.  
For this we provide a suitable hygiene connection for any closure.

Developed and produced in Germany -  
100 % Made in Germany!

Use of high quality materials -  
stainless steel casing, other colour options  
(based on RAL) possible on request!
